Sports Lacquers	page 11

When choosing the right sports floor,
we advise to take into account these points:

1. Lifetime of the floor
2. Activities to be held
3. Sports hall limits (reconstruction of old floor)
4. Optimal construction choice pricewise

Sports and dance floor solutions

Estasport Fitness (1 and 3 strip floor)

- 3 mm thick floor underlay
- 18 mm 2 layer (core: birch) parquet with a T&G locking system and special sports lacquer (Klumpp or Bona) 3.5 mm top layer

NB! Almost any colour and design can be offered (Please check the gallery for standard parquet at www.estaparket.eu)

Esta Fitness is well suited for private gyms and smaller dance studios, especially where small overall floor height is very important and the hall is not suited for professional sports.

FLEXYCLIP Portable Floor System

Dimension and Weight:

1200x600x28/24 mm -15kg/13kg

600x600x28/24 mm -7.5 kg/6.5 kg

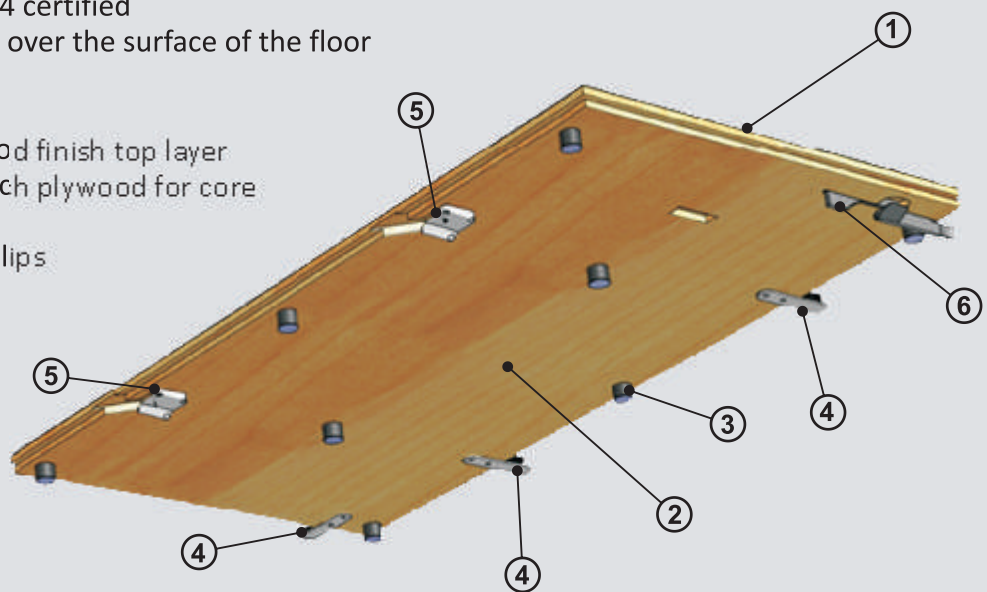

Beech • Maple • Ash

Advantages:

- Top performing sports floor supplied to Sport events like Olympic Games in London 2012
- Fast installation (6 people can assemble 1000m2 in less than 4 hours)
- No hardware, no chassis, no frame, no subfloor, no pads or clips
- FIBA and EN 14904 certified
- Same elasticity all over the surface of the floor

Construction

1. 3.5 or 6 mm wood finish top layer
2. 20 or 24 mm birch plywood for core
3. 20 mm feet
4. Front Clip/side clips
5. Cups
6. Slide

Installation and accessories

METAL CAGES

ALUMINIUM PERIMETER

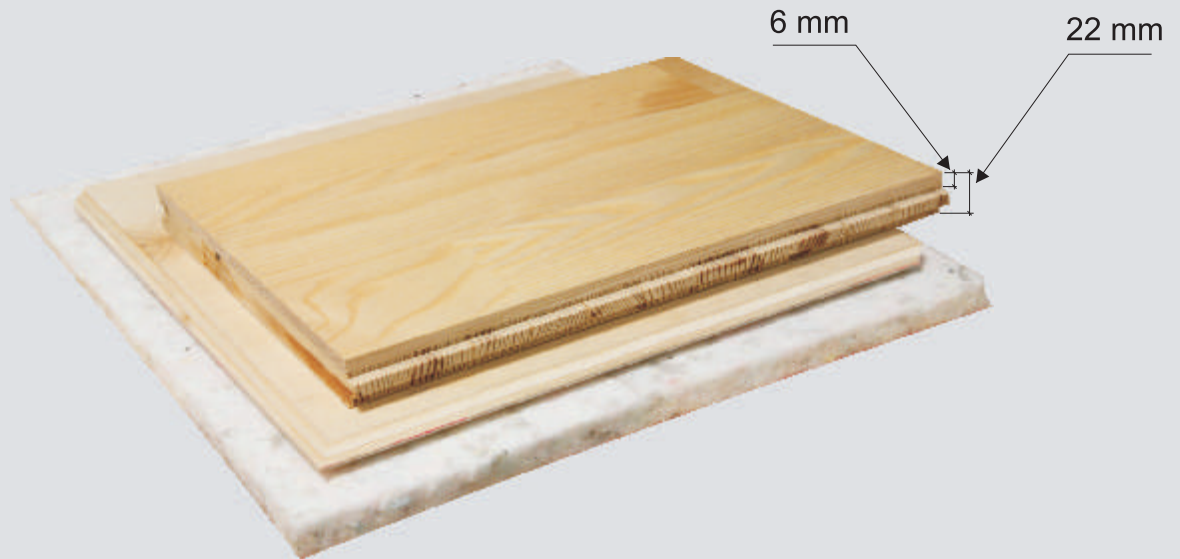

RAMPS

Sports and dance floor solutions

Estasport Pro Long Life

- 12mm thick sports floor underlay
- 12 mm thick birch plywood with T&G on 4 sides
- 22 mm , 3 layer with 6mm top (back layer birch and core pine) parquet with a T&G locking system and special sports lacquer (Klumpp or Bona)

The floor is mainly suitable for local sports halls and school halls. Because of the thick top layer, the floor has the same lifetime as solid floor, but outperforms it in board stability. With proper care and maintenance such floor will last for years and years.

Maintenance of Floors with Sports Lacquer

Esta Sports floor will perform well for many years, but to keep it looking as good, as it was on the very first date we suggest maintaining the floor regularly. The maintenance program depends on how the floor is used and treated.

Day to Day Cleaning

In order to keep the floor clean of dust, sweat, dirt, hair etc. the floor must be dry mopped after every day of use. More advanced cleaning should be carried out dependant on the usage of the sports hall, but at least once a week..

Cleaning of sports floor is usually done with a floor care machine with very low water consumption. NB! You need to take care not to over-wet the floor. To make sure no water has seeped in through the equipment frame covers, these will need to be opened and dried.

TECHNOMAR & ADREM is a family owned Company, implementing the latest advancements in wood processing technology. The Company employs in excess of 600 people and is one of the largest employers in Estonia. Warehousing of the company extends to over 12000m². An area of the same size is used solely for the production of value added goods.

TECHNOMAR & ADREM owns 4 factories located in Maardu just outside Tallinn, the capital of Estonia. Customers are spread across many Industries worldwide and include those involved in Construction, Packaging, Automobile Industry, Engineered Wood Flooring, Furniture, Transport, Cable supplies, etc. Around 95% of products are exported to more than 50 countries throughout Europe, America and Asia.
